COQUINA Mining AND ENVIRONMENTAL Opportunity. Investors, Environmental project managers, developers, and Rock Mine Managers, this 1218 +/- acres property is perfectly located for access to the increasing development of the coastal cities of Fort Pierce, Stuart, Port Saint Lucie, and West Palm Beach. This extremely unique property is also located in an outstanding location due to its proximity to the C-24 & C-25 canals and the fact that it flows straight into the very sensitive Indian River Lagoon. There is opportunity to actually have both a water quality project, floating solar farm, and a mining operation working symbiotically together. Owner has had extensive geologic and environmental surveys performed and has all the documentation to share that shows the extensive aggregate that is available just under the surface. A total of twenty-one (21) engineering borings were drilled to a depth of 40 feet on the site. All of the laboratory tests performed indicated that the materials identified as coquina possess a carbonate content meeting FDOT requirements (i.e., carbonate content of more than 45%) for roadway base rock. On average, the coquina was about 14-feet thick in the cross-hatched areas. Seller is willing to share all surveys and work that has been performed to all qualified buyers. **Listed at \$29,999,000. **Seller financing available**.** Call Travis Brown today for all details and schedule your exclusive showing (863) 634-8034.
